QA Engineer
Everywhere Australia
Testing & Quality Assurance (ICT)

- Hybrid working environment (or remote depending on your location)
- 12-month contract with likely extension | Competitive day rate

A results-driven Quality Assurance Engineer to analyse, troubleshoot, optimise and deliver quality digital products alongside a close-knit project delivery team.

QA Engineer
Everywhere Australia

Everywhere Australia is an innovative group who in 2023 will deliver an evolutionarily application to the Australian market through one of our newly developed products. We are currently seeking a QA Engineer to join our highly experienced project delivery team to assist with the delivery of the application. This role is an initial 12-month contract position with high likelihood of extension to continue to develop this product after launch.

In this role you will:
- Plan, prepare and execute manual and automated test cases to deliver testing to a high standard;
- Develop automated test scripts and frameworks for improved mobile app test coverage;
- Collaborate with the delivery team to deliver products ensuring quality is `built in` to all aspects of product development cycle;
- Continuously improve automated tests for Mobile Apps, API as new features are implemented;
- Report defects found during testing and work closely with developers to resolve issues prior to each release;
- Liaising with product team and development team to ensure the software meets the desired requirements;
- Support release planning activities like pre-release testing, regression testing and post release testing;
- Performing the actual deployments of apps and services to production; and
- Lead, coordinate and execute user testing.

What you will bring:
- Over five years' experience in software testing;
- Demonstrable experience in implementing automation testing of web-based apps, mobile apps, web services and more;
- Have a methodical approach to problem-solving;
- Hands-on experience with programming languages such as: Swift, Java or Python;
- Excellent verbal and written communication skills and the ability to collaborate with the wider project team; and
- Mobile automation testing on IOS and Android platforms.

If you are passionate about app development and this role sounds exciting to you, we would love to hear from you! Please **apply now** and we will review and be in touch with regard to your application.
